Aura

THE NEXT GENERATION
INFORMATION & ENTERTAINMENT SOLUTION
FOR TELCO'S

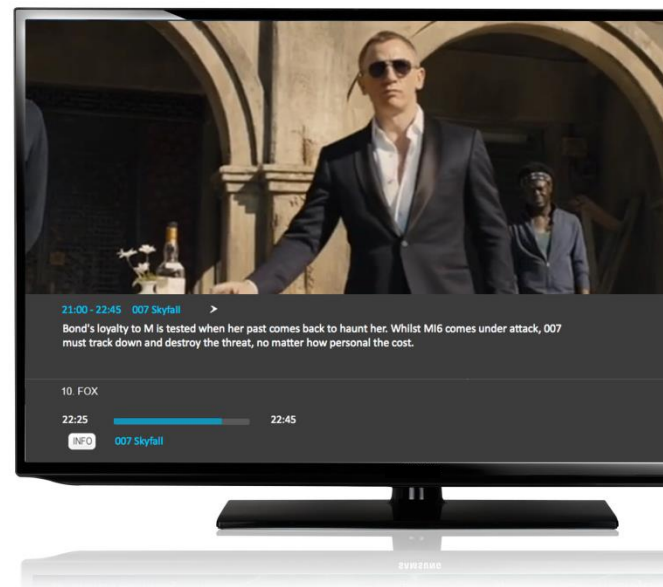

tv solution

Hibox has developed a sophisticated IPTV and OTT platform that has anticipated the future for how people receive and view information and entertainment content. Hibox Aura is a complete IPTV and OTT software platform for delivering TV, Video-On-Demand, and interactive services to end users in any IP-based network.

key features

- ✓ TV-channels (IPTV and OTT)
- ✓ TV-channels (DVB)
- ✓ Electronic-Programme-Guide
- ✓ PVR
- ✓ NPVR (Catchup-TV, Timeshift-TV, Start-Over)
- ✓ Video-On-Demand
- ✓ Multilingual
- ✓ Themes
- ✓ Payment functionality
- ✓ Social media (Instant messaging, Twitter, Facebook etc.)
- ✓ Information services and advertisements
- ✓ Administration interface

On-demand

The catch-up feature enables the user to pause live playback and catch up with it from where they left. Users can also schedule recordings of upcoming programs and set up on-going recordings for favorites directly from the screen of choice.

Customizable

The first impression defines how your customers perceive your service. Therefore Hibox designers will make sure your platform is branded with logos, fonts and colors that match your graphical guidelines. With a wide range of options what comes to user interface design, we can design the perfect skin with your customers in mind.

Control and monitor

Hibox Aura comes with an intuitive web based administration interface, facilitating the administration and implementation of new features and services. This means you have full control over the platform. From the administration interface you can easily view usage statistics for content and services available to your customers. Thanks to the modular design, the services and overall system functionality can be customized to meet your demands.

Mobile experience

We have invested a great deal of time and effort to ensure that Hibox Aura is easy to use. Your customers can enjoy media content from set-top boxes, smart TV's, various mobile devices as well as from traditional desktop and laptop PC's.
